

If you are interested in aerial desailing, cone collecting, or creek cleaning, check out our award-winning website:

**[www.coneharvesters.com](http://www.coneharvesters.com)**

The website contains numerous colour photographs and detailed technical and descriptive information on dozens of topics including equipment usage, rental charges and order forms, as well as lists of experienced helicopter companies and cone collecting contractors in your area.

**Cone Collectors:**

The following Fandrich aerial cone collection equipment is available for rent:

- Fandrich Powerrakes
- Fandrich Shears
- Fandrich Branch Collectors

Contact Fandrich Cone Harvesters or your local helicopter company for more information.

*Information bulletins describing our equipment are available. To request these bulletins, or for details and rates, please call us or visit [www.coneharvesters.com](http://www.coneharvesters.com).*

# Problems with windthrow management?

Fandrich Cone Harvesters

# Use Fandrich Desailers.

Fandrich Desailers use helicopters to lessen leverage of exposed trees by reducing the size of crowns. This helps trees to remain upright even after exposure to excessive winds.

***Fandrich Desailers can desail more than 120 trees per hour.***

The two models of Fandrich Desailers reduce tree sail in different ways.

**Fandrich Delimbers** prune branches.

**Fandrich Toppers** can sever 9-inch-diameter treetops.
